

What is EDUG?

What is EDUG?

Stands for “**E**uropean **D**MIS **U**sers **G**roup”

Regular meetings since mid 1980’s

Not for profit organization of companies
that use DMIS or provide DMIS solutions

What is EDUG?

Members include

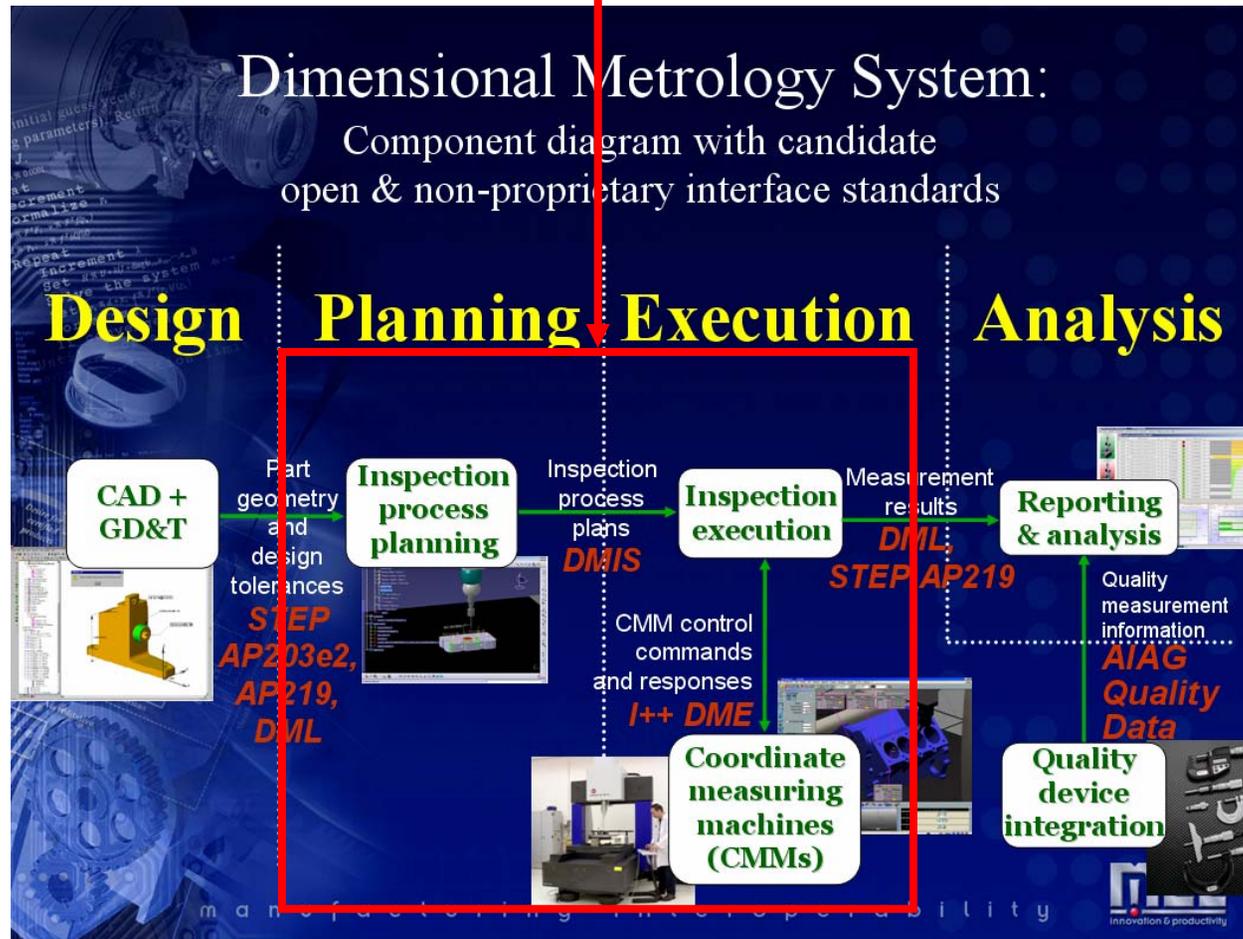

Aus Liebe zum Automobil

Focus of EDUG?

What is EDUG?

The body to enhance the acceptance of DMIS in Europe and promote the use of DMIS

The platform for exchange of information in the European DMIS community

The link between European DMIS users and the American standardization committees and the united voice of all European DMIS users to further enhance the standard

The link to all committees that work on DMIS related activities

Interoperability @ EDUG

Create European conformance classes to

- define a benchmark for basic requirements (incl. DMIS program)
- harmonize machine behaviour between vendors

Identify hurdles and prerequisites to enable the use of DMIS in applications that do not use DMIS today

Provide best practice examples as code snippets and verbally to

- help vendors focussing on necessary developments
- help users to define their needs
- ensure interoperability

Clarification of ambiguous parts of the DMIS standard by

- creation of unambiguous verbiage and pictures
- supplying the European view to the DNSC

Recent EDUG work

Scanning for DMIS 5.0

Improvement of Tolerancing

Identify gaps in I++DME / DMIS

Started “Simplified DMIS” a book for beginners in DMIS and ensure interoperability of basic DMIS functionality
